

## Student victimization at school

*Violence in schools directly affects educators and students by reducing school effectiveness and inhibiting student learning. Additionally, unsafe school environments expose students who may already be at risk for school failure to physical and emotional harm. In recent years, educators and policymakers have voiced growing concern about possible increases in the incidence of school-related criminal behavior. Studying trends in victimization rates provides a picture of the safety of today's schools.*

- Victimization rates at school for high school seniors changed little between 1976 and 1996, with the exception of small increases in the percentage of students who reported being threatened both with and without a weapon in the previous 12 months. The most common type of victimization at school reported by high school seniors in 1996 was having something stolen (38 percent).
- In 1996, black and white high school seniors were about equally likely to report being victimized at school in the previous 12 months, except blacks were more likely to have been injured with a weapon than whites. Ten percent of black high school seniors reported being injured with a weapon in the previous 12 months in 1996, compared to 4 percent of white seniors (see supplemental table 47-1).
- In 1996, high school seniors from metropolitan and nonmetropolitan areas were about equally likely to report being victimized at school in the previous 12 months (see supplemental table 47-2).
- High school seniors were more likely to report being threatened without a weapon at school than with a weapon during the previous 12 months (22 versus 13 percent) in 1996. Similarly, high school seniors were more likely to report being injured at school without a weapon than with a weapon in 1996 (12 versus 5 percent).

### Percentage of high school seniors who reported being victimized at school during the previous 12 months, by type of victimization: 1976-96

Year	Had something stolen	Property deliberately damaged	Injured with a weapon	Threatened with a weapon	Injured without a weapon	Threatened without a weapon
1976	*38.1	25.8	5.7	12.5	13.6	21.3
